

FIT5057 Assignment 2 Assessment Criteria

Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Team Charter	A comprehensive and complete team charter that clearly presents all the key points listed in the assignment description and key elements of the team charter template. The submitted team charter is well-presented.	A complete team charter that adequately presents all the key points listed in the assignment description and key elements of the team charter template with reasonable clarity. The submitted team charter is reasonably well-presented.	A team charter that presents most of the key points listed in the assignment description and elements of the team charter template with some clarity. The submitted team charter is reasonably presented.	A team charter that presents some of the key points listed in the assignment description and elements of the team charter template with limited clarity. The submitted team charter is not reasonably presented.	A team charter that presents none or very limited key points listed in the assignment description and elements of the team charter template have limited clarity. The submitted team charter is not reasonably presented.	No submission or not addressing the criteria
DELIVERABLE 1: Project Initiation						
Task 1 A project charter for the project in the portfolio for which you are the project manager.	A comprehensive project charter that clearly presents all the key points listed in the assignment description and the template. The project charter is well-presented.	A complete project charter adequately presenting all the key points listed in the assignment description and the template with reasonable clarity. The project charter is reasonably well-presented.	A project charter presenting most of the key points listed in the assignment description and the template with some clarity. The project charter is reasonably presented.	A project charter presenting some of the key points listed in the assignment description and the template with limited clarity. The project charter is not reasonably presented.	A project charter presenting limited or no key points listed in the assignment description and the template and lacking clarity. The project charter is not reasonably presented.	No submission or minimal work done.

DELIVERABLE 2: Project Scope Management						
Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 2.1 Develop a requirements traceability matrix (RTM)	An excellent requirements traceability matrix showing excellent level of consideration and justification. Clearly and correctly identifying at least 8 requirements for the project.	An adequate requirements traceability matrix showing a good level of consideration and justification. The the minimum of 8 requirements and their specifications identified are mostly correct.	A requirements traceability matrix that shows some consideration and justification in building the requirements traceability matrix. However, some of the requirements or specifications may not be correctly defined or appropriate for the project.	A requirements traceability matrix that identifies minimal requirements for the project, some of which may not be appropriate for the project.	A requirements traceability matrix that identifies some generic and vague characteristics for the project, some of which may not be relevant to the project.	No submission and/or minimal work done.

DELIVERABLE 2: Project Scope Management

Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 2.2 A project scope statement for the project for which you are responsible (< 500 words)	A well-defined project scope statement that effectively determines and communicates the project's background, objectives and outcomes. The scope statement has a clear explanation of the scope of the project and 5 of its high-level requirements and reflects on what is considered out-of-scope for the project. The project scope and requirements are clearly aligned with the business strategies and portfolio objectives. The statement identifies a minimum of 3 deliverables with their descriptions and at least 3 significant requirements/ characteristics for each deliverable and their source.	An adequately defined project scope statement, that describes and communicates the project's background, objectives and outcomes. The scope statement explains the scope of the project and some of its high-level requirements and reflects on what is considered out-of-scope for the project. The project scope and requirements are aligned with the business strategies and portfolio objectives. The statement identifies a minimum of 3 deliverables with their descriptions and at least 3 significant requirements/ characteristics for each deliverable and their source.	A somewhat defined project scope statement that includes descriptions of the project's background, objectives and outcomes with some explanations of the scope of the project and a few high-level requirements. Some deliverables are identified with some descriptions and requirements.	A project scope statement that addresses some aspects of the project's background, objectives and outcomes and includes the scope of the project and some requirements. Some deliverables are identified and with limited descriptions and requirements.	A project scope statement that has limited description of some aspects of the project's background, objectives and outcomes and includes some information about the scope of the project and some requirements. The deliverables identified are vague and descriptions and requirements lack clarity.	No submission and/or minimal work done.

DELIVERABLE 3: Project Work Breakdown structure and Project Schedule Management

Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 3.1 Develop a work breakdown structure (WBS) up to Level 3 or Level 4 (as appropriate)	A comprehensive WBS (to Level 3 or Level 4, as appropriate) which is consistent with the project charter and project scope statement. The WBS is clearly presented in list or tabular form.	A complete and reasonable WBS (to Level 3 or Level 4, as appropriate) which is consistent with the project charter and project scope statement. The WBS is presented in list or tabular form.	An acceptable WBS that could be missing some elements and/or show a few inconsistencies with the project charter and project scope statement. The WBS is presented in list or tabular form.	A WBS that is missing several major components and is somewhat inconsistent with the project charter and scope statement. The WBS presentation has limited clarity.	A limited WBS that is missing several major components and is inconsistent with the project charter and scope statement. The presentation of the WBS has limitations.	Not submitted and/or minimal work done. No team presentation, collaboration and incorporation of peer feedback
Task 3.2 Team task - Demonstration of the WBS	Presentation to the team, collaboration and incorporation of peer feedback have been conducted in a timely manner, creating a high quality WBS. The two tasks and demonstrations to the team are finished by the end of week 6 of the teaching period.	Presentation to the team, collaboration and incorporation of peer feedback have been conducted in a timely manner, resulting in a reasonable WBS. The two tasks and demonstrations to the team are finished by the end of week 6 of the teaching period.	Presentation to the team, collaboration and incorporation of peer feedback have been conducted in a timely manner, resulting in an acceptable WBS. The two tasks and demonstrations to the team are finished by the end of week 6 of the teaching period.	Presentation to the team, collaboration and incorporation of peer feedback was limited, did not occur or was unreliable.	Limited or no evidence of teamwork and peer collaboration.	
Task 3.3 A Gantt chart	The Gantt chart is clear and accurately depicts the	The Gantt chart is clear and accurately depicts	The Gantt chart shows the tasks,	The Gantt chart shows most of the	The Gantt chart shows some tasks,	Not submitted and/or minimal

DELIVERABLE 3: Project Work Breakdown structure and Project Schedule Management

Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
produced by ProjectLibre, MS Project or other suitable software that accurately depicts the task dependencies, correct task durations and milestones.	tasks, dependencies, appropriate task durations and milestones. The milestones, task durations and dependencies are logically meaningful and feasible, and clearly demonstrate the rational and justification it follows. The total duration of the project is accurately calculated through correct dependencies among tasks and is consistent with the project charter. A clear and concise summary of the rationale for the task duration estimates, dependencies, milestones, and any other assumptions made is prepared to be discussed with team members. Presentation to the team has been conducted in a timely manner.	most of the tasks, dependencies, task durations and milestones. The milestones, task durations and dependencies are meaningful and feasible, and somewhat demonstrate the rational and justification it follows. The total duration of the project is calculated through correct dependencies and is consistent with the project charter. A clear summary of the rationale for the task duration estimates, dependencies, milestones, and any other assumptions made is prepared to be discussed with team members. Presentation to the team has been conducted in a timely manner.	dependencies, task durations and milestones although some elements are missing or misrepresented. The milestones, task durations and dependencies are mostly consistent with the rational and justification it follows. The total duration of the project is consistent with the project charter. A summary of the rationale for the task duration estimates, dependencies, milestones, and any other assumptions made is prepared to be discussed with team members. Presentation to the team has been conducted in a timely manner.	tasks, dependencies, task durations and milestones but some elements are missing or misrepresented. The Gantt chart and its elements, although incomplete, demonstrate some efforts to make them consistent with other deliverables and the project charter. Demonstration was not observed or experienced limited collaboration and teamwork.	dependencies, task durations and milestones but several elements are missing or misrepresented. The Gantt chart does not show sufficient consistency with other deliverables and the project charter. No demonstration observed or not meeting minimum requirements of the demonstration.	work done. No demonstration observed or not meeting minimum requirements of the demonstration.

DELIVERABLE 3: Project Work Breakdown structure and Project Schedule Management

Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 3.4 Team task - Demonstration of the Gantt chart and team reflection	In-class demonstration has been conducted in a timely manner while all team members are present. One team member represents the team and other members provide support when and as needed. The demonstration includes a comprehensive reflection of the approach the team has taken throughout the process of collaboration and teamwork, explaining how the project plans evolved through collaboration and feedback, the extent of change that was required, and what the team learned through the process and connecting theory and practice. The demonstration was accompanied by relevant comprehensive notes and an example of a Gantt chart developed by one team member.	In-class demonstration has been conducted in a timely manner while all team members are present. One team member represents the team and other members provide support when and as needed. The demonstration includes a reflection of the approach the team has taken throughout the process of collaboration and teamwork, explaining how the project plans evolved through collaboration and feedback, and what the team learned through the process and connecting theory and practice. The demonstration was accompanied by relevant notes and an example of a Gantt chart developed by one team member.	In-class demonstration has been conducted in a timely manner while all team members are present. One team member represents the team and other members provide support when and as needed. The demonstration includes a reflection of the approach the team has taken throughout the process of collaboration and teamwork, elaborating what the team learned through the process. The demonstration was accompanied by notes and an example of a Gantt chart developed by one team member.	Demonstration was not observed or did not meet minimum requirements of the demonstration. Team members are absent or not supportive. The reflective review has limitations and does not demonstrate effective collaboration and teamwork. The example Gantt chart shared in demonstration has limitations	Demonstration was not observed or did not meet minimum requirements of the demonstration. Team members are absent or not supportive. The reflective review has limitations and does not demonstrate effective collaboration and teamwork. No Gantt chart presented or the example shared in demonstration has significant limitations.	No demonstration observed and/or no evidence of collaboration and teamwork.

DELIVERABLE 4: Project Cost Management						
Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 4.1 A good and reasonable one-page cost model for the project.	A skilfully developed one-page cost model that demonstrates thorough consideration and justification in addressing all components of the cost model. Visual presentation of the cost model is comprehensive and accurate.	A sufficiently developed one-page cost model that demonstrates adequate consideration and justification in addressing all components of the cost model. Visual presentation of the cost model is adequate.	A cost model that shows some consideration and justification in addressing essential components. Visual presentation of the cost model is somewhat sufficient.	A cost model that shows limited consideration and justification in addressing essential components. Visual presentation of the cost model is acceptable.	A cost model that has several limitations shows minimal consideration and justification in addressing components.	Not attempted and/or minimal work done
Task 4.2 A cost baseline that matches the cost model developed in Task 4.1.	Shows an excellent level of consideration and demonstrates rationale and justification in addressing all components of the cost baseline. The cost baseline is consistent with the cost model.	Shows a good level of consideration and justification in addressing all components of the cost baseline and is consistent with the cost model.	Shows some consideration and justification in addressing some components of the cost baseline with similarities to the cost model.	Minimally addressing some components without clear consideration or justification.	Minimally addressing the components without consideration or justification.	Not attempted and/or minimal work done
Task 4.3 A summary of the main assumptions that underpin the cost model and a brief justification of each (<450 words)	A skilfully developed summary that clearly demonstrates highly relevant assumptions with concise and brief justifications supported by appropriate references.	An adequately developed summary that demonstrates relevant assumptions with brief justifications supported by appropriate references.	A somewhat developed summary that shows some assumptions with some justification and references.	A summary that shows limited or irrelevant assumptions with limited or no justification or considerations.	A limited summary with unclear and inappropriate assumptions with limited or no justification or considerations.	Not attempted and/or minimal work done

DELIVERABLE 5: Project Risk Management						
Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 5.1 A complete risk register for the project to include three potential risks	A comprehensive risk register, clearly identifying three potential risks (two negative and one positive) that are highly impactful on the success of the project/portfolio. The identified risks have high probability and/or high impact. The risks and their root causes and impacts are clearly described. The risks are ranked according to their priority level. Each record includes a concise high-level response strategy that is designed strategically for the identified risks considering their description, impact probability, impact and priority level.	An adequate risk register identifying three potential risks (two negative and one positive) that are reasonably impactful on the success of the project/portfolio. The identified risks have high probability and/or high impact. The risks and their root causes and impacts are reasonably described. The risks are ranked according to their priority level. Each record includes a high-level response strategy that is developed for the identified risks considering their description, impact probability, impact and priority level.	A reasonable risk register identifying three potential risks (two negative and one positive), one of which has a low or very low impact on the success of the project/portfolio. The risks and their impacts are reasonably described. The risks are ranked according to their priority level. Each record includes a high-level response strategy that is somewhat suitable for the identified risks.	A risk register identifying three potential risks that are generic and lack clarity. The identified risks have low or no impact on the success of the project/portfolio. The risks are vaguely described and ranked. The risk register includes some general response strategy without clear considerations for the characteristics of the risk.	A risk register identifying three potential risks that are vaguely described. The identified risks have no relevance to the project and no impact on the success of the project/portfolio. Some notes about response strategies may be present but lack clarity.	No submission and/or minimal work done

Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 5.2 Write a rationale for how you determine the probability and impact for each of the risks identified in task 5.1 (<300 words)	A clear and concise summary of your rationale for determining the probability and impact of each of the risks, showing in-depth and comprehensive consideration and justification. The justification is evidence based and relevant references are cited.	A clear summary of your rationale for determining the probability and impact of each of the risks, showing reasonable and sound consideration and justification. The justification is evidence based and relevant references are cited.	A summary of your rationale for determining the probability and impact of each of the risks, showing basic consideration and some justification. The justification is using reliable sources of information.	A summary that has limited rationale for determining the probability and impact of each of the risks, with limited justification and does not use any evidence or references.	A very limited summary about determining the probability and impact of the risks, with no justification or use of evidence or references.	No submission and/or minimal work done
Task 5.3 Plot all the risks identified in Task 5.1 on a probability/impact matrix and analyse the application of the matrix for management and decision making (<200 words)	Excellent and well-presented probability/impact matrix. A skilfully developed write-up on the application of the matrix for management and decision making with a clear conclusion and recommendation to the client, helping them make informed decisions in relation to project risk management.	A well-presented probability/impact matrix. An adequately developed write-up on the application of the matrix for management and decision making with a conclusion and/or recommendation to the client, helping them make informed decisions in relation to project risk management.	A reasonable probability/impact matrix. A clear write-up on the application of the matrix for management and decision making with a conclusion and/or recommendation to the client.	A reasonable probability/impact matrix. A write-up on the application of the matrix for management and decision making that raises some points and includes a somewhat clear conclusion and/or recommendation.	A probability/impact matrix and a limited write-up on the application of the matrix for management and decision making without a clear conclusion and/or recommendation	Not attempted and/or minimal work done

DELIVERABLE 6: Project Quality Management						
Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 6.1 A list of two quality standards/requirements that meet the stakeholder expectations and portfolio requirements	Two clearly identified quality standards/requirements that are essential for meeting stakeholder expectations and portfolio requirements. The description of each standard/requirement is well-defined and demonstrates a clear and in-depth understanding of quality management in projects. The assumptions listed justify the quality standards/requirements and their relevance to the project.	Two identified quality standards/requirements that are essential for meeting stakeholder expectations and portfolio requirements. The description of each standard/requirement demonstrates a sound understanding of quality management in projects. The assumptions listed justify the quality standards/requirements and their relevance to the project.	Two identified quality standards/requirements that are somewhat essential for meeting stakeholder expectations and portfolio requirements. The description of each standard/requirement demonstrates a basic understanding of quality management in projects. The assumptions listed somewhat justify the relevance of the quality standards/requirements to the project.	Two identified quality standards/requirements that could lead to meeting stakeholder expectations and portfolio requirements. The quality standards/requirements are accompanied by a description and limited justification about their relevance to the project.	Two identified quality standards/requirements that are not aligned with stakeholder expectations and portfolio requirements. The description has limited or no justification about their relevance to the project.	No submission and/or minimal work done
Task 6.2 Determine your metrics for the quality standards/requirements and how you will measure progress on meeting the two quality standards/requirements identified in Task 6.1	Skilfully developed metrics and progress measures that are strategically selected to ensure the quality standards/requirements will be met. Where possible, a clear reference to the recognised industry benchmarks or standards is made.	Adequately developed metrics and progress measures that are relevant to meeting the quality standards/requirements. Where possible, a clear reference to the recognised industry benchmarks or standards is made.	Reasonably developed metrics and progress measures for ensuring that the standards/requirements will be met, although the progress measures and metrics are not clearly specified.	Limited metrics and progress measures developed. It is not evident that any of the standards/requirements could be met.	Limited or no metrics and progress measures that lack clarity or relevance to the quality standards/requirements.	No submission and/or minimal work done

DELIVERABLE 7: Project Stakeholder and communication Management						
Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Task 7.1 Prepare a stakeholder register including at least 8 stakeholders	A comprehensive stakeholder register that clearly identifies at least 8 key stakeholders. The listed Stakeholder includes those who have high power/interest towards the project and are clear priorities in the stakeholder engagement plan. The identification and choice of the communication approach are highly appropriate for each stakeholder.	An adequate stakeholder register that identifies at least 8 key stakeholders. The listed stakeholders include those who have high to moderate power/interest towards the project and are priorities in the stakeholder engagement plan. The identification and choice of the communication approach are appropriate for each stakeholder.	A somewhat adequate stakeholder register that identifies most key stakeholders, although may have missed stakeholder groups or the listed groups have minimal power/interest in the project. The identification and choice of the communication approach are somewhat appropriate for each stakeholder.	A limited stakeholder register. The identification and description of the stakeholders is general and missing some key elements. Includes an acceptable communication approach for the listed stakeholders.	A very limited stakeholder register that is missing some key elements. The choice of communication approach, if presented, may not be suitable for the listed stakeholders.	No submission and/or minimal work done
Task 7.2 Create a stakeholder management and engagement strategy for the project focusing on two stakeholders who are not on the project team	Strategic and clear identification of stakeholders and well-justified stakeholder management and engagement strategies for both stakeholders who are not on the project team. Includes sophisticated considerations regarding the confidentiality of information when the stakeholders are outside the project.	Reasonable identification of stakeholders and a justified stakeholder management and engagement strategies for both stakeholders who are not on the project team. Includes appropriate considerations regarding the confidentiality of information when the stakeholders are outside the project.	Demonstrates acceptable attempts to identify stakeholder management and engagement strategies with only critical information. Includes some considerations regarding the confidentiality of information when the stakeholders are outside the project.	Demonstrates a limited description of the stakeholder management and/or engagement strategies. Includes little consideration regarding the confidentiality of information when the stakeholders are outside the project.	Very limited description of the stakeholder management and/or engagement strategies. Does not show consideration regarding the confidentiality of information.	No submission and/or minimal work done

Task	Excellent	Good	Moderate	Pass	Near Pass	Unrated
Completeness and correctness of statements; clarity of expressions,	The report contains clearly structured information that is focused on developing project plans with clear supporting information. The analysis demonstrates originality, creativity, and sophisticated thinking. The statements show an excellent understanding of the foundation of this unit and a strong capability to transform the theories into intellectual contributions.	The report contains mostly structured information that focuses on developing project plans with supporting information. The analysis shows originality and creative thinking. The statements show a sound understanding of the foundation of this unit and a reasonable capability to transform the theories into intellectual contributions.	The report contains some structured information to develop project plans with some supporting information. The analysis raises some points, and the statements show a basic understanding of the foundation of this unit and the potential to transform the theories into real contributions.	The report presents some project plans with limited analysis and supporting information. The statements show a marginal/limited understanding of the foundation of this unit.	The report presents basic project plans with limited or no analysis. The statements imply a lack of understanding of the foundation of this unit.	Mostly incomplete and unclear.
Use of suitable references and application of the APA style of referencing	Used a minimum of 10 references, 5 of which from peer reviewed academic journals or conference publications. The references are relevant to the project idea and client organisations' industry and are published within the past 10 years. The referencing style clearly follows the American Psychological Association (APA) style of referencing.	Used a minimum of 10 references, 5 of which from peer reviewed academic journals or conference publications. The references are relevant and are published in the past 10 years. The referencing style clearly follows the American Psychological Association (APA) style of referencing.	Used a minimum of 10 references, 5 of which from academic journals or conference publications. The references are relevant. The referencing style follows the American Psychological Association (APA) style of referencing	Used a minimum of 10 references, 5 of which from academic journals or conference publications. The referencing style follows the American Psychological Association (APA) style of referencing	Used limited references, some of which from academic journals or conference publications. The referencing style does not follow the APA style of referencing or is missing some essential elements.	No citations or minimal work done

Note:

The differences between being “skillful” and “sufficient” (or “adequate”):

- Skillful: demonstrate **expertise** in the ability, knowledge, or skills to perform a task
- Sufficient/adequate: demonstrate **required and necessary** ability, knowledge, or skill to perform a task
